## Projects

### Anonymous Q&A

Clemson, SC

SCHOOL OF COMPUTING, CLEMSON UNIVERSITY

2016 - PRESENT

- Question & Answer sites (Q&A sites; e.g. Quora, Yahoo! Answers etc.) are playing an increasingly important role in information seeking and sharing. Askers and answerers use different identities to participate in Question & Answer sites. They use their real names, pseudo-names or anonymity to post questions and answers. Explored the relationship between identity and user engagement, content quality and trolling behavior. Also explored the relationship between anonymity and content moderation.

### CrowdSec

Clemson, SC

SCHOOL OF COMPUTING, CLEMSON UNIVERSITY

2017 - PRESENT

- Personal smartphones are in the hands of over 90 American adults, and are at high risk for security threat. Although passwords and pins are commonly used to alleviate these threats, they are easily hacked and still leave the user vulnerable. Explored video chat as an alternative form of authentication using the users existing social network.

### mHealth

Clemson, SC

SCHOOL OF COMPUTING, CLEMSON UNIVERSITY

2014 - 2015

- Patients want granular privacy control over health information in electronic medical records(EMR). Designed a mobile application to assess patients' desire for granular level privacy control over which personal health information should be shared, with whom, and for what purpose; and whether these preferences vary based on sensitivity of health information.

### ChronicWeb

Pittsburgh, PA

HUMAN-COMPUTER INTERACTION INSTITUTE, CARNEGIE MELLON UNIVERSITY

2013 - 2014

- Explored the impact of individual differences on trust in the context of information seeking behavior. Developed two scales to measure trust in websites and trust in forums.
